EDUCATION

Narula Institute of Technology (MAKAUT)

Bachelor of Technology in Electronics & Instrumentation

Percentage: 66%

Kolkata - 700 109, India

August 2019 - August 2023

EXPERIENCE

Highradius | Web Application Development Intern

Hybrid | January 2022 - April 2022

- Developed an invoice management system, reducing manual payment tracking time by 60%.
- Designed and implemented interactive dashboards using React.js and deployed APIs with Node.js.

CodeClause | Web development Intern

Remote | June 2023 - July 2023

- Built real-time applications (translator, text editor, recommender) with HTML, CSS, and JavaScript.
- Enhanced responsiveness and user engagement by 30% through optimized UI/UX design.

SKILLS

Programming Languages:	C#, Javascript, HTML, CSS, TypeScript, SQL, Basic Python
Libraries/Frameworks:	ASP.NET Core Web API, ADO.NET, Axios, ASP.NET MVC, ReactJS, ShadcnUI, Tailwind, DaisyUI, NextJS, ExpressJS, EmailJS
Tools / Platforms:	VSCode, Clerk Auth, Bubble.io, Git & Github, Razorpay, AI Agent 11Labs, Framer, Netlify, VAPI AI, Open-router API, Drizzle-ORM, NodeJS, CHAT-GPT, Vercel, Docker (Basics), NodeJS, REST APIs, Postman, Swagger, API Integration, CRUD Operations, Render, ChatGPT
Databases:	Microsoft SQL Server (MSSQL), MongoDB, Convex, Basic Firebase

PROJECTS / OPEN-SOURCE

PharmaNest | Link

React.js, Tailwind CSS, Axios, Framer Motion, Razorpay

Developed responsive frontend for PharmaNest using React.js and Tailwind CSS.
Built medicine listing, authentication flow, cart system, and order placement UI.
Integrated REST APIs using Axios for frontend-backend communication.
Implemented protected routing using React Router DOM.
Designed reusable components and managed state using React Hooks.
Enhanced UI/UX with Framer Motion animations and React Toastify notifications.

PharmaNestBackend | Link

ASP.NET Core Web API, C#, ADO.NET, MSSQL, Stored Procedures, REST APIs, Docker, Postman

Engineered high-performance backend APIs using ASP.NET Core Web API and C#.
Optimized 95% of database operations using ADO.NET and SQL Server Stored Procedures.
Delivered secure authentication, cart, and order workflows with seamless API integration.
Improved deployment efficiency through Docker-based backend containerization.

Mediecho AI | Link

Next.js, TypeScript, Tailwind, NeonDB, Drizzle ORM, VAPI AI, OpenRouter API

- Built a lifelike AI doctor avatar with speech recognition and real-time medical reports.
- Integrated Razorpay subscriptions + Clerk authentication with a PostgreSQL credit system.
- Reduced AI response latency by 25%, serving 50+ demo users with production-grade reliability.

Frontend Guru | Link

React, Tailwind, Shadcn UI, Framer, Clerk, Razorpay, 11Labs AI, Firebase

- Developed a scalable e-learning platform with 10+ active learners and integrated Razorpay.
- Embedded an AI voice assistant, improving new user retention by 40%.
- Automated deployments via CI/CD pipelines, ensuring continuous delivery and uptime.

Youtube-Backend-API | Link

Node.js, Express.js, MongoDB, JWT, Cloudinary, Bcrypt, Postman

- Engineered a RESTful backend API with video upload, secure authentication, and content delivery.
- Implemented JWT-based auth, file handling, and cloud storage with Cloudinary.
- Designed with modular Express.js architecture, ensuring maintainability and scalability.

CERTIFICATIONS

- My All Certifications Link - **Click Here**
- Software Engineer Intern Role Test - **HackerRank**
- Frontend Developer (React) Role Test - **HackerRank**
- Javascript - **HackerRank**
- React - **HackerRank**
- Problem Solving - **HackerRank**
- Web Application Development Intern - **Highradius**
- Web Development Intern - **CodeClause**
- Javascript Development Internship referral - **Call For Referral**
- Bubble No-code Mastery - **Udemy**

HONORS & AWARDS

- Secured 4th place in JIS Hack-O-Innovation(2022-23) for developing an Android-based metal detector car as a final year project, integrating Android app development, Arduino systems, Bluetooth communication, and sensor technology.
